Location: Cairo, Egypt

Professional Summary

Flutter developer and software engineer with 4+ years shipping production mobile, web, and desktop applications across e-learning, education-management, and non-profit sectors. Built and deployed a full-scale e-learning platform to Google Play and the App Store, integrating payments, online examinations, and Firebase-backed REST APIs. Comfortable owning a feature from architecture through CI/CD release, with hands-on experience in clean architecture, state management, and AI-assisted (context engineering) development workflows.

Professional Experience

Ajeep E-Learning Platform - Cairo, Egypt

Jul 2024 – Present

Software Engineer - Flutter Developer

- Engineered and shipped a full e-learning application across Android, iOS, desktop, and web using Flutter, then released it to Google Play and the App Store. The Google Play listing has a 4.1-star rating based on 90 reviews (1K+ downloads).
- Integrated payments, course management, online examinations, and exam screen-protection into the production app, taking each feature from architecture through release.
- Built RESTful API and Firebase integrations to sync course, user, and exam data, and automated builds/releases with CI/CD pipelines; applied AI-assisted (context engineering) workflows to speed up feature development.

The Future University - Khartoum, Sudan

Jan 2023 – Jun 2024

Flutter & Backend Developer

- Built a Flutter attendance-management application for the university, replacing a manual, paper-based attendance process with a digital workflow.

- Built and maintained RESTful backend services in Laravel to power multiple university management system modules.
- Served as backup technical-support specialist for university systems, troubleshooting and resolving day-to-day app and system issues for staff and students.

Code Sudan - Khartoum, Sudan

Jul 2021 – Dec 2021

Flutter Developer

- Built a charity-focused Android application from the ground up using Flutter, applying clean architecture principles from the first commit.
- Structured the codebase for testability, readability, and long-term maintainability rather than a quick-and-dirty MVP build.
- Worked within a small development team to take the app from initial concept through a release-ready build.

Education

The Future University - Khartoum, Sudan

Oct 2017 – Apr 2022

Bachelor's Degree in Computer Science

Qualifications & Skills

- Flutter.
- Dart.
- Cross-Platform Development (Android, iOS, Web, Desktop).
- RESTful API Integration.
- Firebase.
- Clean Architecture & Clean Code.
- State Management (BLoC / Provider / Riverpod).
- UI/UX Design Principles.
- CI/CD & Automated Deployment Pipelines.
- Git & GitHub.
- App Store, Google Play & Microsoft Store Release Management.
- AI-Assisted Development / Context Engineering.
- Team Leadership.
- Cross-Functional Collaboration.
- Attention to Detail.
